

Name:_____ Date:_____

Shopping Percents Project

Each student will hand in the following:

- 1 shopping flier with 5 items, prices and discounts on them
- 1 answer key with the sale prices of each item with all calculations
- 1 completed shopping wish list with all calculations

Directions:

1. On a blank sheet of paper, make a sale flier for a store that you create. Be sure to include a creative store name.
2. Glue each picture on your circular and include the original price. Make sure to include a different percent off price for each item! Also include the name of each item.
3. Make sure everything is neat and spelled correctly. You may want to include a short description of each item. You may type this **AT HOME** and glue the pictures on if you would like.
4. On the answer key paper, show all work and find the sale price of each item in your flier. Make sure this is neat and perfect. You can use a calculator to check.
5. After everyone is finished, sit with your group and pass around your circulars. Choose 4 items that you would like to buy. Calculate how much each one will cost. Then calculate how much you will spend total.
6. This project must be turned in in its entirety on:

Name:----- Date:-----

Answer Key

Original Price	Discount (Show all work here)	Sale Price

Name: _____ Date: _____

Store and Item	Original Price	Discount (show all work here)	Sale Price

Total Amount of money spent: _____

Total amount of money saved: _____
